About Me

I'm a self-taught Front-end developer who was introduced to web development when trying to figure out **how** and **why** certain websites and applications are **just different**. This fascination into clean and effective UI designs and interactive functionalities that I experienced on the web led me deep dive into building my own applications. I'm interested in writing clean code, exploring various modern web technologies and the **end user.** I care about understanding their needs and building a good user centric product.

Relevant Experience

Junior Frontend Developer @ Koach
May 2021 - present // Dublin, Ireland

▷ Help designing and building the interface across the app to make it more user-friendly
▷ Learning and working with a variety of different languages and technologies such as Ruby on Rails (MVC framework), TailwindCSS and JavaScript
▷ Working with git branches
▷ Communicate and collaborate directly with a CEO and CTO on regular basis

Code Mentor @ Coder Dojo
Oct 2019 - Jan 2020 // Dublin, Ireland

▷ Volunteered as a code instructor for local children
▷ Worked closely with students for developing the projects and solving the problems
▷ Helped students with programming concepts such as if statements and functions

Projects

To Do
▷ Designed and developed a single page application four different views (Focus, Daily, Weekly, Monthly)
▷ Implemented JavaScript concepts such as event bubbling, scrolling event, handling form submission and cross-browser compatibility and responsive design
▷ ES6 JavaScript, React, Styled-Components, React Router, Context API, GSAP

Twitter Clone
▷ Developed a full-stack single page Twitter clone app with three core views (Home, Profile, Edit Profile)
▷ Implemented login authentication, storing tweets in database, retrieving data from database and cross-browser compatibility
▷ Core things covered are building authenticated routes and React custom hooks
▷ ES6 JavaScript, React, React Router, Firebase (Auth, Firestore, Storage), Sass

Timer
▷ Designed and developed a minimalistic timer application that features functionalities of timer and stopwatch.
▷ Implemented Object-oriented JavaScript, webpack, cross-browser compatibility and responsive design
▷ Vanila JavaScript, HTML, CSS/Sass

Design Agency (Creative landing page)
▷ Developed a single page website for virtual design agency, design inspired by awwward.com
▷ Implemented creative overlay animation at the start of landing page, cross-browser compatibility, responsive design
▷ ES6 JavaScript, React, React Router, GSAP, Sass

Skills

Programming Languages
JavaScript (ES6), HTML, CSS/Sass

Libraries & Frameworks
React, Styled Components, GSAP, Three.js, Node.js, Express

Tools & Platforms
Git, Webpack, Gulp, Netlify, Firebase

Design
Figma
