About Me

I'm a self-taught Front-end developer who found passion for building web applications. I was introduced to programming when trying to figure out **how** and **why** certain websites are **just different**. This fascination into clean and effective UI designs and interactive functionalities that I experienced on the web led me deep dive into web development. I'm interested in writing clean code, exploring various modern web technologies and importantly the focus on the **end user.** I care about understanding their needs and building a good user centric product and I hope I could be part of your team following this journey.

Projects

Music Experience App on Web (Minor thesis project)

▷ Developing a music experience application on web for college minor thesis with the goal of empowering musical creativity for general internet users.

▷ Features a simple synthesizer and generative 3d visuals that users can interactively manipulate.

▷ Conducted two interviews with professional developers and one focus group for competitor analysis for the research part of the project with effective communication skill

▷ ES6 JavaScript, React, Web Audio API, three.js

To Do

▷ Designed and developed a single page application four different views (Focus, Daily, Weekly, Monthly)

▷ Implemented JavaScript concepts such as event bubbling, scrolling event, handling form submission and cross-browser compatibility and responsive design

▷ ES6 JavaScript, React, Styled-Components, React Router, Context API, GSAP

Twitter Clone

▷ Developed a full-stack single page Twitter clone app with three core views (Home, Profile, Edit Profile)

▷ Implemented login authentication, storing tweets in database, retrieving data from database and cross-browser compatibility

▷ Core things covered are building authenticated routes and React custom hooks

▷ ES6 JavaScript, React, React Router, Firebase (Auth, Firestore, Storage), Sass

Design Agency (Landing page)

▷ Developed a single page website for virtual design agency, design inspired by awwward.com

▷ Implemented creative overlay animation at the start of landing page, cross-browser compatibility, responsive design

▷ ES6 JavaScript, React, React Router, GSAP, Sass

Timer

▷ Designed and developed a minimalistic timer application that features functionalities of timer and stopwatch.

▷ Implemented Object-oriented JavaScript, webpack, cross-browser compatibility and responsive design

▷ Vanila JavaScript, HTML, CSS/Sass

Relevant Experience

Code Mentor @ Coder Dojo
Oct 2019 - Jan 2020 // Dublin, Ireland

Volunteered as a code instructor for local children. Worked closely with students for developing the projects and helped them solving problems during the process. Personal mentoring for advanced students with their code.

Skills

Programming Languages
JavaScript (ES6), HTML, CSS/Sass

Libraries & Frameworks
React, Styled Components, GSAP, Three.js, Node.js, Express

Tools & Platforms
Git, Webpack, Gulp, Netlify

Design
Figma

Education

Technological University Dublin
BA (Hons) Commercial Modern Music Songwriting

FreeCodeCamp
JavaScript Algorithms and Data Structures Certification 2021 - present

Udemy
Web Development Bootcamp   2019 - 2019

Git a Web Developer Job : Mastering the Modern Workflow   2019 - 2019

Interests

Music, film, running, tennis, cooking
